vessel sealing

ALL IN ONE, NOT ALL AT ONCE.

Introducing the LigaSure Advance™ Pistol Grip

THE LIGASURE ADVANCE™ PISTOL GRIP

COVIDIEN

positive results for life™

[ONE DEVICE MULTIPLE BENEFITS] ▶

CONSISTENT SEALS

Provide confidence during and after your procedures

CUTTING INDEPENDENT OF SEALING

Leaves the critical cutting decision in your hands

MULTIFUNCTION

Vessel sealing, fine dissection, grasping from one instrument

LOW THERMAL SPREAD

From responsive energy and insulated jaws

EXTENDED REACH

44 cm length for increased access to target structures

Uncompromising care from your trusted hands. You have the confidence that comes from knowing you haven't compromised a single thing to gain an advantage over time in the O.R. You can be efficient and thorough. You can move fast, and most important: You won't worry tomorrow about the effectiveness of today's procedure.

Insulated jaws minimize heat transfer and protect from unwanted thermal damage.

Monopolar tip facilitates fine dissection, spot coagulation and creation of otomies.

44 cm shaft length let's you reach farther in obese and taller patients.

Wide bilateral jaw opening for effective access to target structures and tissue separation.

Fine dissection or consistent seals? With the LigaSure Advance™ instrument, you don't have to choose.

The LigaSure Advance™ instrument is a monopolar tip laparoscopic vessel sealer and divider that offers multifunction capability in one instrument. The combination of advanced monopolar energy with LigaSure™ sealing technology allows surgeons to reduce exchanges between dissecting, ligating and grasping instruments. Supported by more than 300 peer-reviewed publications, LigaSure™ technology has been shown to deliver reliable and consistent seals. It all adds up to efficient procedures and consistent performance for you and your patients.

LigaSure™ vessel sealing technology provided unmatched consistency and reliability on vessels, lymphatics and tissue bundles up to 7 mm.

Integrated cutting mechanism independent of sealing, leaving the critical decision in the surgeon's hands.

Valleylab™ Mode provides a unique combination of monopolar hemostasis and dissection while using a lower power setting resulting in less char, thermal spread and arching than a traditional coagulation mode.

Ergonomic handle design accommodates a wide range of hand sizes.

LigaSure Advance™ Pistol Grip Instrument

Order Information

Order quantity: 6 units/case

Catalog number: LF5544

Sterile, single use

Shaft length: 44 cm
Shaft diameter: 5 mm
Shaft rotation: 340 degrees
Jaw type: Bilateral with monopolar tip
Jaw surface: Smooth with ceramic stops
Jaw aperture: 15 mm
Jaw length: 18 mm

The LigaSure Advance™ instrument is compatible only with ForceTriad™ energy platform software version 3.2 or higher. Please contact your local Covidien energy expert about software upgrade opportunities.

For more information about the LigaSure Advance™ instrument go to www.LigaSure.com/advance or call 800-722-8772.

ForceTriad™ Energy Platform

Order Information

Order quantity: 1 unit

Catalog number: ForceTriad
